

Italmatch Chemicals, Multinational Company leader in manufacturing and sales of organic and inorganic specialty chemicals and polymers, is looking for a:

CTS SPECIALIST GREASE INDIA

Mission:

Reporting to the LPA CTS Manager India, the CTS Specialist Grease provides technical support to Sales force and he/she deals with customers in order to solve and meet their technology expectations.

Main activities:

In particular, he/she deals with:

- Provide the pre and post sales' technical and commercial support of products for leading clients, also through direct contact with customers as well as support to the dedicated sales organization and agents/distributors network;
- Support the Sales force with technical data sheets, test data, applicative data of finished formulations containing the Company products and quotation;
- Assist in the selection and configuration of standard and customized products, to meet customers' application requirements;
- Prepare technical brochure, slides and supportive documents for updating customers, sales organization and distributors network;
- Being able to inspect and test Industrial oil and greases as per defined test methods;
- Identify & implement new test methods/equipments inhouse as well as globally accepted;
- Understand the results and being able to relate the data with actual field challenges;
- Meet customers, discovering the technical requirement and delivering the solution accordingly;
- Ensure all quality checks, testing, validation and cross verifications on products at all stages of process as per defined guidelines, procedures and work instructions;
- Ensure timely and organized upkeep of all testing and development records & data;
- Carry out formulation optimizations and pilot blend developments as per the production and technical requirements;
- Handle & up-keep of all laboratory equipment, instruments and accessories and carry out calibrations as specified in calibration schedule;
- Carry out periodic stock counting of all laboratory chemicals and ensure testing activities are not delayed due to unavailability of chemicals, glassware & consumables;
- Ensure proper upkeep of all current test methods with periodic review to update current testing practices as per changes in test methods along with the global team;
- Look to localise the global formulations in India.

Education & Experience:

- Master of Science Organic Chemistry, Bachelor of Engineering or Bachelor of Technology Chemical;

- Experience: 3 to 5 years in Grease testing and evaluation

Behavior & Competencies:

- Basic knowledge of performance additives used in greases and neat oils;
- Basic knowledge of manufacturing of grease;
- Being a good team player and acting as per situation demand;
- Self-motivated and being able to perform evaluation independently.

Location: Hyderabad, Telangana India
